Password: zola123

1.Uvod

1.1 Korišćeni programki jezici

HTML, CSS, JavaScript, JQuery, AJAX, PHP, MySQL baza podataka,Bootstrap 3, JQuery pluginovi: lightbox.

Projekat je pisan u Notepad++ editoru.

1.2 Opis funkcionalnosti

-Admin panel: Pristup administracionom delu sajta ima samo korisnik koji ima odgovarajuci username, sifru i id u bazi. Takodje mora da ima i ulogu admin. .Služi da administratoru olakša manipulaciju sadržajem sajta kao što su: dodavanje, brisanje i editovanje korisnika, dodavanje brisanje i editovanje proizvoda kao i editovanje i brisanje komentara. Kad se admin uloguje u header-u se pojavljuje link kad admin panelu.

-Dinamički meni: Nalazi ne na svakoj strani u header-u i izvlači se iz baze.

-Logovanje i zaštita sesijama: Logovanje se nalazi u gornjem desnom uglu i pristupa mu se klikom na button login. Provera se regularnim izrazima. Nakon uspešne provere prave se sesije sa prethodno pokupljenim podacima iz baze podataka. Sesije se brišu kada se klinke na link Logout.

-Registracija: Nalazi se na stranici register.php. Korisnik popunjava svoje podatke a zatim se vrši provera prvo na korisničkoj a zatim i na serverskoj strani. Ukoliko je sve dobro popunjeno izaći će obaveštenje da je korisnik uspešno registrovan i da mu je aktivacioni email poslat na email adresu koju je prethodno napisao. Kad klikne na Confirm link u email adresi, to će ga odvesti na stranicu gde će moći da se uloguje sa svojim podacima.

-Anketa: Anketa se nalazi stranici author.php. Glasanje se zapisuje u bazu putem AJAX-a. Takođe postoji i funkcija koja se poziva na svake tri sekunde a koja ponovo iščitava podatka iz baze podataka i na taj način korisnik ne mora da refrešuje stranicu da bi video da li je još neko osim njega glasao. U koliko pokuša da glasa više puta izlazi obaveštenje koje mu kaže da nema pravo na to. Svi imaju pravo glasa, a u bazu se upisuju IP adrese.

-Komentari: Moguće je komentarisanje proizvoda. Samo ulogavi korisnici mogu da postavljaju komentare. Postavljenja komentara se vrši preko AJAX-a koji prosledjuje podatke o korisniku i komentaru na php stranicu preko koje se podaci upisuju i bazu i zatim taj rezultat vraća korisniku. Na taj način se njegov komentar pojavljuje bez potrebe za refrešovanjem stranice.

-Like i Dislike proizvoda: Svaki korisnik može da lajkuje i dislajkuje proizvode. Podaci se u bazu upisuju preko AJAX-a i na taj način se korisnikov glas odmah dodaje na preostale glasove bez prethodne potreba da se stranice refrešuje. U bazu se upisuju IP adrese i glasanje je moguće samo jednom za svaki proizvod.

-Add to cart: Na stranici za svaki proizvod se nalazi dugme Add to cart. Ukoliko korisnik nije ulogovan odvešće ga na stranicu gde će moći da se uloguje ili registruje ukoliko nema nalog. Ukoliko je ulogovan i klikne na Add to cart podaci se preko AJAX-a upisuju u bazu i ispisuje se Product is added to yout cart. Takođe se u header-u pored korpe povećava broj porudžbina za jedan, takođe preko AJAX funkcije koja se klikom ponovo pozvala a koja iščitava broj porudžbina iz baze.

-Kontakt forma: Nalazi se na stranici contact.php. Svaki korisnik može da posalje svoju poruku gde je prethodno upisao svoje ime i email adresu. Provera se vrši u JavaScript-u i ako je sve dobro salje se email na kodom zadatu email adresu.

-Promena profilne slike: Nalazi se na stranici myProfile.php. Svaki korisnik može da promeni svoju profilni sliku. Prvo odabere koju sliku hoće klikom na button browse i zatim klikne na button Change profile picuture. Promena se obavlja preko php-a i zahteva refrešovanje stranice.

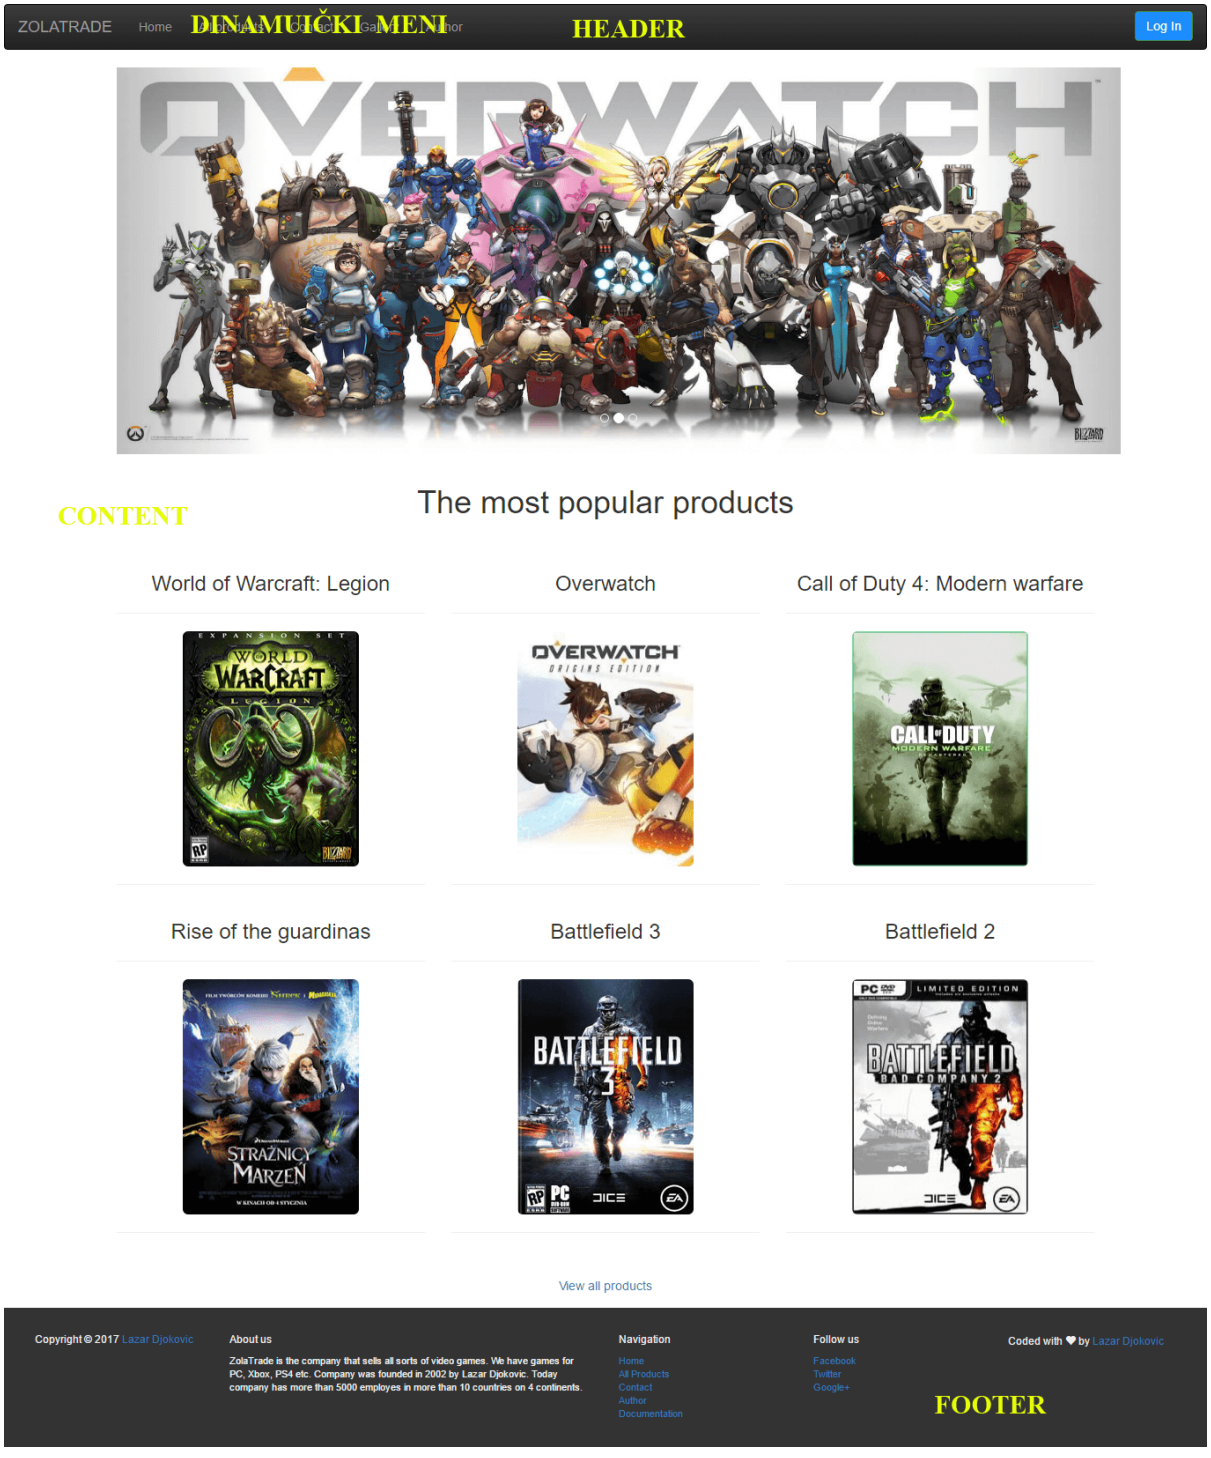
-Poništavanje porudžbina: Nalazi se na stranici myProfile.php. Poništavanje se vrši preko AJAX-a tako što na php stranicu šalje koje porudžbine je korisnik štiklirao i te porudžbine briše iz baze. Takođe ponovo poziva AJAX funckiju koja izlistava korisnikove porudžbine.

-Straničenje: Nalazi se na stranici allProducts.php. Prikazuje 9 proizvoda po stranici.

-Singlepage

-Galerija: Nalazi se na stranici gallery.php. Urađena je u lightbox-u. Iščtiva sve slike proizvoda iz baze.

1.3 Template



<?php

```
                                                    session_start();

   if(isset($_REQUEST['btnLogin'])){

                                                    $username=$_REQUEST['user
name'];
                                                     $password=
$_REQUEST['password'];

                                                    $password=md5($password);

                                                     $query="SELECT * FROM
users WHERE username='".$username."' AND password='".$password."' LIMIT
1";

                                                     include("connection.php");

                                                    $result=mysql_query($query,
$connection);
                                                     mysql_close($connection);

                                                     $id="";
                                                     $dbPassword="";
                                                     $dbUsername="";
                                                     $dbActive="";
```

```
                                                    while($row=mysql_fetch_arr
ay($result)){
                                                        $id=$row['idUsers'];

```

Here we are counting rows in the slidepicture table, and we are making on variable count with value 0.

Than we are asking is the if the number of the rows is bigger than variable count.

In while we ask is the the value of the count 0, if it is than we echo li with class active,

otherwise the dot wont br white when the page loads.

If it's not 0 we echo li without class active.
